SH150

The SH150 is lightweight, slim and a joy to ride, the SH150 never fails to attract admiring attention with its sleek, curvaceous form.

INTRODUCTION

INTRODUCTION

With its strong performance and light handling, the SH150 makes cross-town errands and even daily commutes a non-stop delight

The SH150's PGM-FI fuel injection leads to optimum scooter performance. A key fuel-saving technology incorporated into the SH150 is Idling Stop. It's operated via a switch on the right handlebar and, when enabled, automatically stops the engine running after three seconds at idle, and re-starts it instantly when the throttle grip is twisted.

STYLING

With smooth contours, subtle lines and angles the SH150's bodywork flows back to its tapered tail.

The overall effect - perfect lines to protect you from the elements, so you can arrive at your destination looking the way you want. The SH150 delivers a unified sense of urban elegance and the highest levels of comfort

FEATURES

The SH150 offers a superb smooth all-purpose ride, which has won instant praise for its superior handling and effortless control.

To make daily life on board the SH150 that little bit more convenient it's now fitted with the Honda Smart Key system. The Smart Key itself resides in the rider's pocket and does away with the need to constantly insert and withdraw a key for ignition, fuel cap and seat.

The front/rear lights are now LED and as all scooter riders know it's the details that make all the difference - adding a larger glove box which houses a useful 12V charging socket – and of course the all-important utility hook secures bags safely.

SPECS

ENGINE

ENGINE TYPE	Liquid-cooled 4-stroke SOHC single
BORE AND STROKE	58mm x 57.9mm
COMPRESSION RATIO	10:6
CARBURATION	PGM-FI electronic fuel injection
